

**MILLER ELECTRIC COMPANY**  
*Powering the Possibilities*

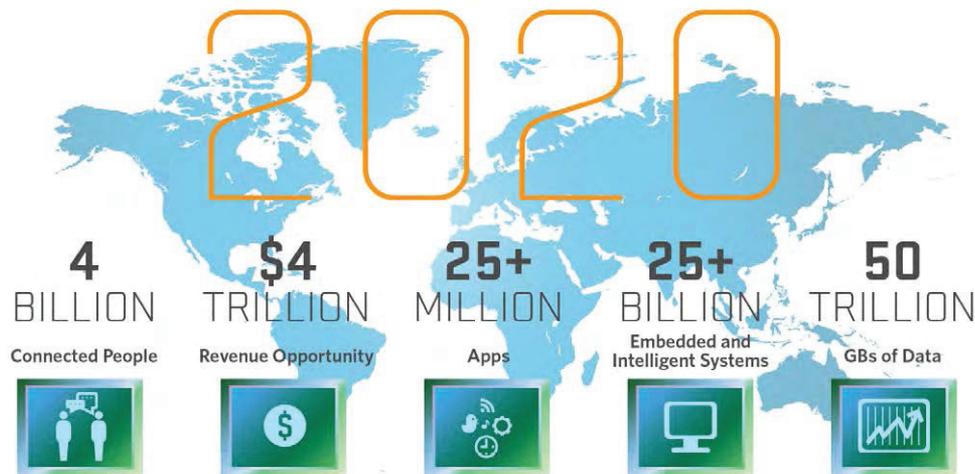

MILLER ELECTRIC COMPANY  
**INTEGRATED SYSTEMS**

“THE CONVERGENCE OF IT, FACILITIES, AND ENERGY IS CREATING A NEW SET OF POSSIBILITIES. WE ARE APPROACHING A TIME WHERE EVERYTHING WILL BE LINKED TO A NETWORK – CREATING INFORMATION TO DRIVE BUSINESS PERFORMANCE. THE TRUST THAT WE ARE ABLE TO DEVELOP WITH OUR CLIENTS PUTS US IN A PERFECT POSITION TO HELP THEM NAVIGATE THIS CHANGING LANDSCAPE. AT MILLER ELECTRIC COMPANY, WE HAVE UPGRADED OUR CAPABILITIES TO NOT ONLY BE YOUR FACILITY PARTNER, BUT ALSO YOUR BUSINESS PARTNER – NOT ONLY HANDLING YOUR INFRASTRUCTURE, BUT HELPING YOU LEVERAGE THE INCREASED CONNECTEDNESS TO DRIVE BUSINESS PERFORMANCE.”

**HENRY K. BROWN, CEO**

## Internet of Things

The movement towards smart, connected, autonomous, and contextually aware devices built around the *Internet of Things* (IoT), creates a revolution that will change the world for the better. Devices can now communicate intelligently to each other or to us, in real time, processing data in the cloud or at the node, deciding autonomously or presenting the most up-to-date information to us so we can make the best decisions.

*IP based solutions are continually expanding beyond traditional voice/data solutions*

IP based solutions are continually expanding beyond traditional voice/data solutions, and are integral to many organizational operations – information transport system, safety, security, building management, in-building wireless, mass notification. While implementing solutions for our clients in diverse industries with unique technology needs and challenges, *Miller Integrated Systems* provides infinite possibilities when it comes to harnessing technology solutions for success.

*Miller Integrated Systems* provides 24/7/365 support quickly and efficiently to clients nationwide. We leverage our broad industry knowledge to act as an extension of our clients to deliver scalable, consistent, and high-quality technology solutions.

## Key Industries

*Miller Integrated Systems* supplies a broad range of industries with our expertise in assessing, designing, implementing, and supporting technology solutions to reduce both cost and risk. Some of the key industries that we support include:

- Commercial
- Financial
- Insurance
- Healthcare
- Manufacturing
- Civil
- Telecommunications
- Government
- Education
- Industrial
- Sports/Entertainment
- Intelligent Traffic

### *Strategic Partnerships*

*Miller Integrated Systems maintains certifications with the industry's leading manufacturers. These strategic relationships allow us to provide infinite solutions to your IP challenges.*

# Technology Solutions for Today's World

With our unique capabilities and broad range of technology experts, IT decision makers consider Miller Integrated Systems a solutions provider rather than a contractor.

Our focus is on understanding a client's business objectives and delivering the infrastructure, security, and building management solutions that best meet their needs.

## Information Transport Systems

From the core infrastructure to the wireless edge, the importance of a properly designed and functioning IT infrastructure cannot be understated. At *Miller Integrated Systems*, we have the expertise and experience required to design an IT system that meets the ever-changing industry demands and solves the challenges of today's business environments.

## Building Management

Reduce energy usage and maintain building efficiency utilizing the latest in IP based systems and analytics. The demand for a more reliable, secure and energy efficient facility is growing. *Miller Integrated Systems* delivers intelligent building solutions that lower capital expenses and reduce operating costs. Our solutions enable you to integrate power, IT and facilities - connecting all assets with physical infrastructure.

- *Energy Audit & Analysis*
- *Intelligent Lighting*
- *DCIM*

## Security

*Security Connected to IT, HR, Finance and BMS.* Our commitment to open architecture means that we provide you with a fully customizable solution. So, you're free to choose best-in-class solutions for each need, ensuring your systems continue to work together without locking you into one vendor or technology. We understand how critical these components are and offer a suite of design, implementation and support services that allow you to cost-effectively manage security devices across your enterprise.

- *Closed Circuit Television*
- *IP Video & Analytics*
- *Access Control*
- *Monitoring*

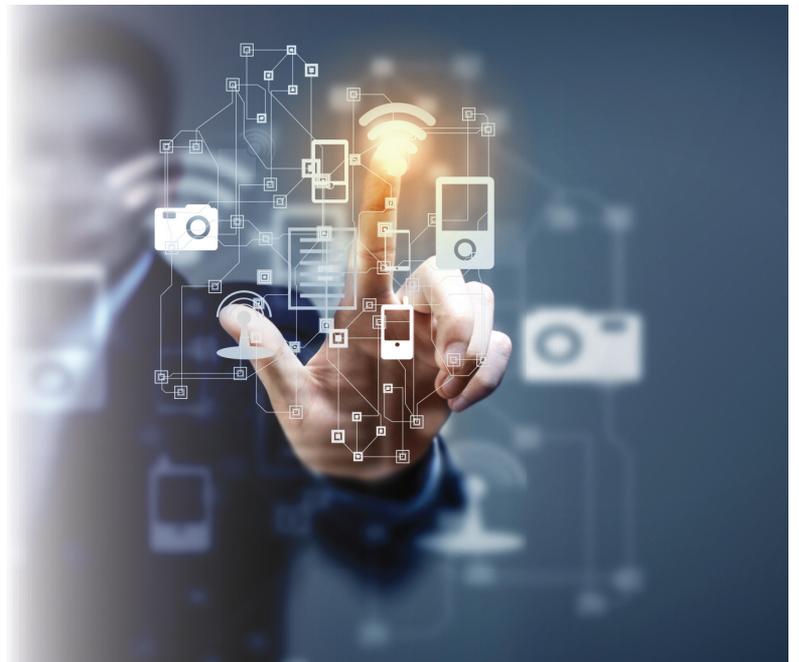

## Mass Notification Emergency Communications

More and more companies are not comfortable relying solely on fire alarm or paging system as a means of communication for emergency events. In fact, a general cultural shift in our perception and expectations for access to information, has created a greater responsibility and obligation for companies to inform occupants during emergencies such as:

- *Catastrophic events*
- *Weather pattern emergencies*
- *Hurricanes / Tornados*
- *Tsunami / Earthquakes / Fires*
- *Acts of Terrorism*
- *Chemical Spills*
- *Bio Hazards*

*Miller Integrated Systems IP based mass notification solutions provide the coverage, reach, and clarity clients need to ensure quality communications during emergency events*

## In Building Wireless

Wireless cellular and public safety requirements continue to drive the need for robust in-building wireless systems. *Miller Integrated Systems* works with carriers, manufactures, and clients to craft a case-by-case wireless solution designed to keep any building, campus or venue connected. To meet the specific needs of each client, a *Distributed Antenna System (DAS)* must be a custom wireless network system designed to support any and all cellular, data or multimedia needs.

- *Cellular Voice and Data*
- *Public Safety and LMR*
- *Site Survey*
- *Wireless Needs Assessment*
- *Design*
- *Commissioning and Optimization*

## Build

As technology environments become increasingly complex, *Miller Integrated Systems* allows customers to focus on their core business.

We collaborate with our clients to ensure a thorough understanding of their existing infrastructure and future needs. With this knowledge, we provide design and installation management assistance to ensure our clients are provided with reliable, flexible, and cost effective infrastructures, as well as controlling future operational expenses.

*Miller Integrated Systems* provides flexible services as needed whether it is design assistance, project management, turn-key solutions, or staff augmentation, we can deliver your project on-time and within budget.

## Monitor

No infrastructure will stay reliable and flexible without continuous monitoring and controls. With a combination of hardware, software, and procedural development, you can have vision and knowledge of your network that provides unprecedented control of your physical infrastructure.

*Miller Integrated Systems* can provide a real-time, comprehensive view of your physical network infrastructure. With intelligent infrastructure solutions and coordinated work flow management, we provide our clients with the peace of mind that comes with an in-depth knowledge of their network.

## Maintain

New infrastructure investments typically represent a major capital expenditure, as well as a potential disruption to operations. Clients rely on our continued predictive analysis, maintenance, and emergency services to provide maximum utilization of an existing infrastructure.

Proper maintenance of an infrastructure ensures maximum uptime, long-term sustainability, and cost effective utilization. *Miller Integrated Systems* provides an extensive industry backed knowledge of leading edge services for our clients.

We understand that needs vary by client and we can work with you to develop a turn-key maintenance package to fit your budget and risk profile. Our maintenance solutions provide you the peace of mind to focus on your business, while our team delivers maximum performance and utilization of your infrastructure.

- *Data Center Assessments*
- *Onsite Maintenance 24/7 Support*
- *Critical Infrastructure Documentation*
- *Preventative/Predictive Maintenance*
- *Vendor Management*
- *Infrared Imaging*
- *Disaster Recovery Services*

## Optimize

Our clients are consistently being asked to increase the quantity of devices and storage on their networks. No client has an infinite budget to meet these demands.

Miller's approach will allow you to realize the greatest return on your infrastructure investment by increasing efficiency, lowering risk, increasing availability, maximizing scale, and improving sustainability. Optimization of existing resources is the only cost effective means to provide the infrastructure flexibility.

Many businesses today must make business decisions based upon the capabilities of their infrastructure. Our goal at *Miller Integrated Systems* is to work with you to make sure your infrastructure is optimized to prevent it from holding your business back.

*Miller Integrated Systems* can ensure as you optimize your infrastructure, that you look at optimizations which are cost effective and will directly improve your overall business.
